

Live More Sustainably

Live a healthier, more satisfying life,
Save money, energy, water and resources
Strengthen our economy and community,
Protect our environment
STAR OR JOIN AN ECOTEAM!

What is an EcoTeam?

EcoTeams are small education-action groups of 5-10 people who meet on a flexible schedule to learn about sustainability issues, and to discuss changes we can make at the individual, group and community levels. Any neighborhood, faith-based, workplace, friends or civic group can create an EcoTeam.

What do we do?

Most EcoTeams will meet 4-6 times in someone's home, a church or other location. The core topics covered include water, waste, energy, and transportation, with additional topics such as food, consumption, and local resilience. Upon completion, participants will be recognized and invited to join ongoing local efforts, workshops and field trips to increase sustainability of our community.

Our goal is to form supportive peer networks for individual, group and community efforts. Together we can work towards social, economic and environmental sustainability -- for ourselves and future generations.

How can I be part of an EcoTeam?

For more information about joining or forming an EcoTeam, please contact Daniel Parker at: ecoteams@sustainabletallahassee.org or 850-567-3201
